General information

PVS23820200820

The DAT 1400 weight transmitter has a mechanical keyboard, removable screw terminal blocks and a peak hold function for dynamic measures. It has the ability to integrate different options based on customer needs. For example, among the options there are the analog input which can be in tension or electrical and the RS485 connection to external smart junction box. The Software Optimation is given for free. This Software allows you to run certain activities such as calibration or monitoring directly from your computer. The Optimation software is provided by Pavone Systems and guarantees a perfect instrument run.
